

● Emergency Medical Services ●

- HSAS Emergency Medical Services providers are highly trained healthcare professionals who are often the initial point of contact with the health care team
- Emergency Medical Services personnel work in rural and urban communities and hospitals across Saskatchewan, ensuring that appropriate health care services are provided in a timely way
- HSAS Emergency Medical Services health care professionals are authorized by physicians to provide patients with a wide variety of medical interventions including heart defibrillation, intravenous medication and oxygen administration
- Emergency Medical Services providers are charged with emergent and non-emergent, on the scene treatment, crisis intervention, life saving stabilization and transport of ill and injured patients.
