

## **• PHYSICAL THERAPISTS •**

- HSAS Physical Therapists are highly specialized health care professionals with a Bachelor or Masters Degree in Physical Therapy
- Physical Therapists employed in health care work with clients in hospitals, long term care facilities, rehabilitation centres and in the community
- HSAS Physical Therapists play a primary role in maximizing the health, well-being and independence of Saskatchewan residents who are struggling to cope with arthritis, stroke, lung disease, spinal cord injuries and developmental problems
- Physical Therapists work with other health care professionals in assessing and treating patients in critical and acute care, post surgical rehabilitation and neo-natal care
- More Physical Therapists are required to provide high quality educational, preventative, restorative and palliative care services
