

• Psychologists •

- **HSAS Psychologists are highly skilled health care professionals who have a Masters or Doctoral Degree in Psychology**
- **Psychologists employed in our health care system work with clients in hospitals, clinics and in communities across Saskatchewan**
- **HSAS Psychologists play a primary role in research and providing education to residents of Saskatchewan about the psychological factors necessary to maintain wellness and prevent disease**
- **Psychologists work with other health care professionals to assess and treat patients suffering from psychological problems, brain injuries, pain management issues and mental illness**
